

PATENT
Attorney Docket No. 224162

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:

Brown

Group Art Unit: 1272

Application No. 10/656,581

Examiner: Unassigned

Filed: September 5, 2003

For: COMPOSITION COMPRISING
PEARLESCENT SILICONE OIL BEADS

REQUEST FOR CORRECTED FILING RECEIPT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir or Madam:

Applicants respectfully request that a corrected version of the Official Filing Receipt dated November 26, 2003 (a copy is enclosed with requested changes marked in red) be issued for the above-identified application.

Particularly, applicants respectfully request the following:
The title, "FRAGRANCE FORMATION CONTAINING PEARLESCENT SILICONE OIL BEADS", should be corrected to read --COMPOSITION COMPRISING PEARLESCENT SILICONE OIL BEADS--

In this respect, applicants submit herewith a copy of the first page of the specification filed on September 5, 2003.

Respectfully submitted,

By

Date Mailed: 11/26/2003

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. **If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).**

CROSS-REFERENCE TO RELATED PATENT APPLICATIONS

[0001] This patent application claims the benefit of U.S. Provisional Patent Application No. 60/408,575, filed September 6, 2002.

FIELD OF THE INVENTION

[0002] This invention pertains to a composition having an aesthetically appealing appearance and to a spray assembly comprising a container and the composition.

BACKGROUND OF THE INVENTION

[0003] Cosmetic products, such as those in the form of sprays, can have a variety of applications, such as, for example, a sanitizer (e.g., for hands or face), shine spray, perfume, air freshener, toner, moisturizer, body spray, colorant (e.g., for hair), sunscreen, and an acne treatment. Aside from the actual performance of the product for its intended performance, one important factor that drives consumers to select one cosmetic product over another is the visual appearance of the product, not only of the container, but also of the composition itself. A second important factor that distinguishes one cosmetic product over another, especially for spray-on products, is the feel of the product after it is applied to the skin.

[0004] There is a continuing effort to make many existing cosmetic products more effective by improving the "after-feel" of a product, for example, such that they do not render the skin greasy, and so that they have an improved visual appeal. Previous attempts to enhance the after-feel benefits and visual appeal of such products have not been fully satisfactory. For example, U.S. Patent 6,270,782 ("the '782 patent") discloses a composition comprising an oil phase, an aqueous phase, and a pigment in the form of particles, which are effective to form the oil phase into stable droplets. However, the oil phase of the composition is made up of mineral oil, which can leave a heavy or greasy feeling on the skin after application. In addition, according to the '782 patent, the container used to dispense the composition cannot contain a dip tube that extends into the droplet layer or else the droplet layer breaks, deforms, or clings to the container.

[0005] In addition, U.S. Patent 3,920,883 ("the '883 patent") discloses a cosmetic composition comprising oil, water, organic liquid miscible in water, and finely divided solid
